- Cats:** We highly recommend that all cats be tested for **Feline Leukemia Virus (FLV)** and **Feline Immunodeficiency Virus (FIV)**. The cost for this combination test is \$49.00. If these tests have not already been done, we can run them before any surgical procedure is performed.

- All Animals:** Sedation, anesthesia, and surgery do carry some risk; therefore, the clinic recommends blood testing for all animals. Many anesthesia agents are removed from the body by the liver and kidneys, so it is important to know that these organs are functioning properly. The test also checks the blood count to make sure there are enough red blood cells to carry oxygen while your pet is being treated. The cost for this procedure is \$64.50.

- All Animals:** We offer microchip implantation with Home Again ID Microchips. If you would like to have a microchip implanted in your pet, we recommend that it be done with this surgical procedure. The cost for the microchip implant and registration is \$44.00.

- All Animals:** I understand that during the performance of the following procedure(s), unforeseen conditions may be revealed that necessitate a variance in the procedure(s) and estimate as listed below. I expect B.V.V.C. to use reasonable care and judgment when dealing with these variances, and contact me at the above number as soon as possible to discuss such variances. I understand that complications resulting from the procedure(s) will not relieve me from any obligation to all reasonable costs incurred during treatment. **Payment for procedures is due when the animal is released.**

I have read and understand the preceding 4 sections. \_\_\_\_\_ Initials
